

RESEARCH OPPORTUNITY!

Participate from your home computer

When you have Turner Syndrome, you hear a lot about what is missing.

But we want to learn about the chromosomes you DO have!

By studying the impact of family background, we hope to better understand and personalize interventions for girls with Turner syndrome.

We need your help! Please contact Rebecca Procopio at 570.522.9423 or raprocopio@geisinger.edu or visit geisingerADMI.org/SCA to learn more about how you can participate through online questionnaires.
