

Because you know
your child best

Join the Geisinger ADMI/GenomeConnect research study

At Geisinger's Autism and Developmental Medicine Institute (ADMI), we know that you are the expert on your child's health history. We are conducting research to improve our health survey questionnaires by gathering the best information we can from parents like you. By participating in our study, you can help us to understand the difference between what you know about your child's health and what's actually in our records. This project is related to GenomeConnect, the Clinical Genome Resource patient portal.

To be eligible, your child must:

- Register with GenomeConnect (genomeconnect.org/?referrer=ADMI), an online registry that allows you to securely share your child's health history and genetic information
- Have had genetic testing
- Receive primary care through Geisinger
- Be a patient at Geisinger's ADMI and have a follow-up appointment scheduled in 2016

For more information, call Juliann Koenig at 570-214-3308 or visit GeisingerADMI.org/care-innovation/studies/.

We'll reimburse you with a \$25 Amazon gift card for your time and travel.

Participating in this study is voluntary. If you do not wish to participate, your decision will not affect your care or treatment at Geisinger.
