

Shrek

At the Berwick Theater and Center for Community Arts

For some people, going to a movie can be difficult because of the loud sounds and dark environment. Imagine the impact on a child with special needs who is affected by this sensory overload.

Geisinger's Autism & Developmental Medicine Institute (ADMI), SPARK, and The Berwick Theater and Center for Community Arts are happy to offer children with special developmental needs and their families a chance to experience the joy of seeing a movie on the big screen. These films will:

- Provide a comfortable and accepting environment for those who want to get up, move around or make noise
- Feature family-friendly movies in 2D
- Begin on-time, with no previews or trailers
- Lower the volume of music and special effects
- Provide low-level lighting, instead of total darkness
